

HYBRIDE

Newly arrived, our Hybride casements and awnings combine the strength of aluminium with PVC's low transfer rate of heat towards the exterior. They will satisfy the most demanding.

A unique design, these windows are available in a 5 5/8" frame with the advantage of a recessed sash located within the insulated part of the wall helping considerably to reduce heat lost and condensation.

Combine together aesthetics, strength and performance.

FEATURES:

- 5 5/8" thermal fusion welded, multi-chambered PVC frame with a contemporary style snap-on extruded aluminium cladding
- 4 standard colors of extruded aluminium available with a wide variety of optional colors possible
- Exterior walls of the extruded aluminium 2 mm thick
- Sturdy PVC sash welded at the corners with an extruded aluminium exterior, with crimped corner assembly
- Multiple air chambers for superior energy efficiency
- Integrated frame cavity for drywall or wood jamb extensions
- Fiberglass screen mounted on an aluminum frame
- No caulked joints
- 7/8" double glazed sealed unit or 1 3/8" tripled glazed sealed unit
- Sloped sill
- Triple replaceable weather stripping
- Structural frame allows a maximum visible glass surface
- Retractable "Encore" handle made by Truth
- Multi-point locking mechanism lets you open and close with a single movement

OPTIONS :
